Approximate round trip times in milliseconds:

The diagram illustrates a network topology. A central 'Net' router is connected to a 'DATACENTER' box. Inside the Datacenter, there are two servers: 'HOTSTAR' (172.16.0.10) and 'NETFLIX' (172.16.0.20). The 'Net' router is also connected to a 'DNS' server (8.8.8.8) via a physical link. The DNS server is enclosed in a dashed green circle. The 'Net' router has two interfaces: 'e0/0' and 'e0/1'. The 'e0/0' interface is connected to the 'DATACENTER' and the 'HOTSTAR' server. The 'e0/1' interface is connected to the 'DNS' server. The 'Net' router is labeled 'Net' and has a 'Winserver' icon. The 'DATACENTER' is labeled 'DATACENTER' and contains the 'HOTSTAR' and 'NETFLIX' servers. The 'DNS' server is labeled 'DNS' and has the IP address '8.8.8.8'.
